Software Level 4 Requirement: (Project structure implementation)

Objective is to make the Project structure in existing v1.0 software in which both the application program and configuration settings will open using single file only.

Architecture:

Process:

UI Requirement:

One tab of “Project” should be added in Menubar. In Project menu there are following sub menus.

1. Project
 - 1.1. New Project
 - 1.2. Open Project
 - 1.3. Save Project
 - 1.4. SaveAs Project
 - 1.5. Exit

(Existing Menu of “Application File” & “Configuration File” should be removed)

Backend logic requirement:

A. Case 1:

1. When user launch the software and clicks on the File ----New Project
2. One popup should come which will ask for user to save the project path & project name
3. On that path one folder should create of user name ,inside that folder there will be 3 files 1. ProjectName.xmpro 2. ProjectNameApp.csv 3. ProjectNameConfig.csv (only for user)

B. Case 2:

1. When user launch the software and clicks on File---- Open Project
2. One popup should come in which user will able to select only .xmpro extension file from any path.
3. After opening that file all existing saved application & Configuration should open.

C. Case 3:

1. When user directly opens the existing saved .xmpro file that project should open on XMpro software.

- D. When user clicks on SaveAs project should ask for path & project name, On that path one folder should create of user name ,inside that folder there will be 3 files 1. ProjectName.xmpro 2. ProjectNameApp.csv 3. ProjectNameConfig.csv (only for user)

- E. When user clicks on Save latest changes should be saved.

Note:

1. Rename "PLC" menu to "Status/Simulation"
2. Keep Menu bar sequence as follows:
Project,Download/Upload,Status/Simulation,Help
3. For PLC utility should send App.csv & Config.csv only
4. When user click on "Download--- Application" then **App.csv** will go to PLC via TFTP
5. Whwn user clicks on "Download--- Configuration" the **Config.csv** will go to PLC via TFTP
6. When user click on "Upload ---Application" then **App.csv** will come from PLC via TFTP
7. Whwn user clicks on "Upload ---Configuration" the **Config.csv** will from PLC via TFTP
